Commit messages

- clean + contextual
- start w/ capital letter
- concise
- answer 'Why?'

Commits

- small + independent

What not to do

- solve multi. problems w/ 1 commit
- combining commits that solve 2 diff. problems
- don't overuse amend
- don't change history

How git functions

Git tracks snapshots

- work w/ in working directory
- staging area
  -> put files here to be apart of next snapshot
- Repository
  -> where we have history log
  -> snapshots are here
